

Car Museum Field Trip

On Wednesday the 28th in March, a small group of around 7 kids went to LaMay's American Car Museum in Tacoma near the Tacoma Dome. We had a very small group, but it was an experience for those who have never been there before, looking at the many different types of vehicles from different time periods in our history and as well as learning their story through life.

I know nothing about cars, but I thought it was a fun experience looking at all the cars I have never even heard of. This personally was my first going to a car museum and it was amazing, all the cars were kept clean and in the best condition. They have from Classic cars, to Nasa Cars, to the newer cars and more, it is a large selection of just beautiful vehicles. As we were going through the Museum, we found that there were racing simulators with different vehicles and tracks, as well as a slot car game where you get to race small cars on a small route. If there is any chance, I would suggest going, it is a lot of fun and very interesting to hear each cars story, because they are all different, it is very worth the trip to go.
