

Habitat for Humanity Field Trip

At Henderson Bay we take the opportunity to go on field trips. We do field trips for fun, to get away from school and we also go out and help our community. For our second field trip of the year we are going to be helping out with the 'Habitat For Humanity' society. We will help build homes for people in the future who are having trouble with having a roof over their head. There is no cost for going, just your willingness to give yourself a day to help other amazing people build something they don't have so they get what they need.

Habitat for Humanity helps build future homes for people who can't afford to buy/rent a home, so they negotiate what they can pay for, and they help with the building process as much as they can. The advantage is A.) It'll get done faster and B.) They don't have to pay too much for the building. They are a good organization, and helping them out with what they do is a lot of fun.
